

Single Source Supplier of Aviation Fueling Equipment and Systems

For more than 150 years combined, Smith Meter™ and Sening™ – product brands of FMC Technologies Measurement Solutions – have been top names in aviation refueling equipment. Known for superior quality, safety, and efficiency, Smith Meter™ and Sening™ products are designed for reliable, easy operation based on a thorough understanding of our customers' needs.

Now, the best is even better. We've teamed up Sening™ and Smith Meter™ with LTS Sales to offer a broad range of products with expanded services to our customers. Together we have the ability to accommodate complete aviation fueling systems. The synergy, collective knowledge and experience of these well respected brands provide superior products and systems with improved savings.

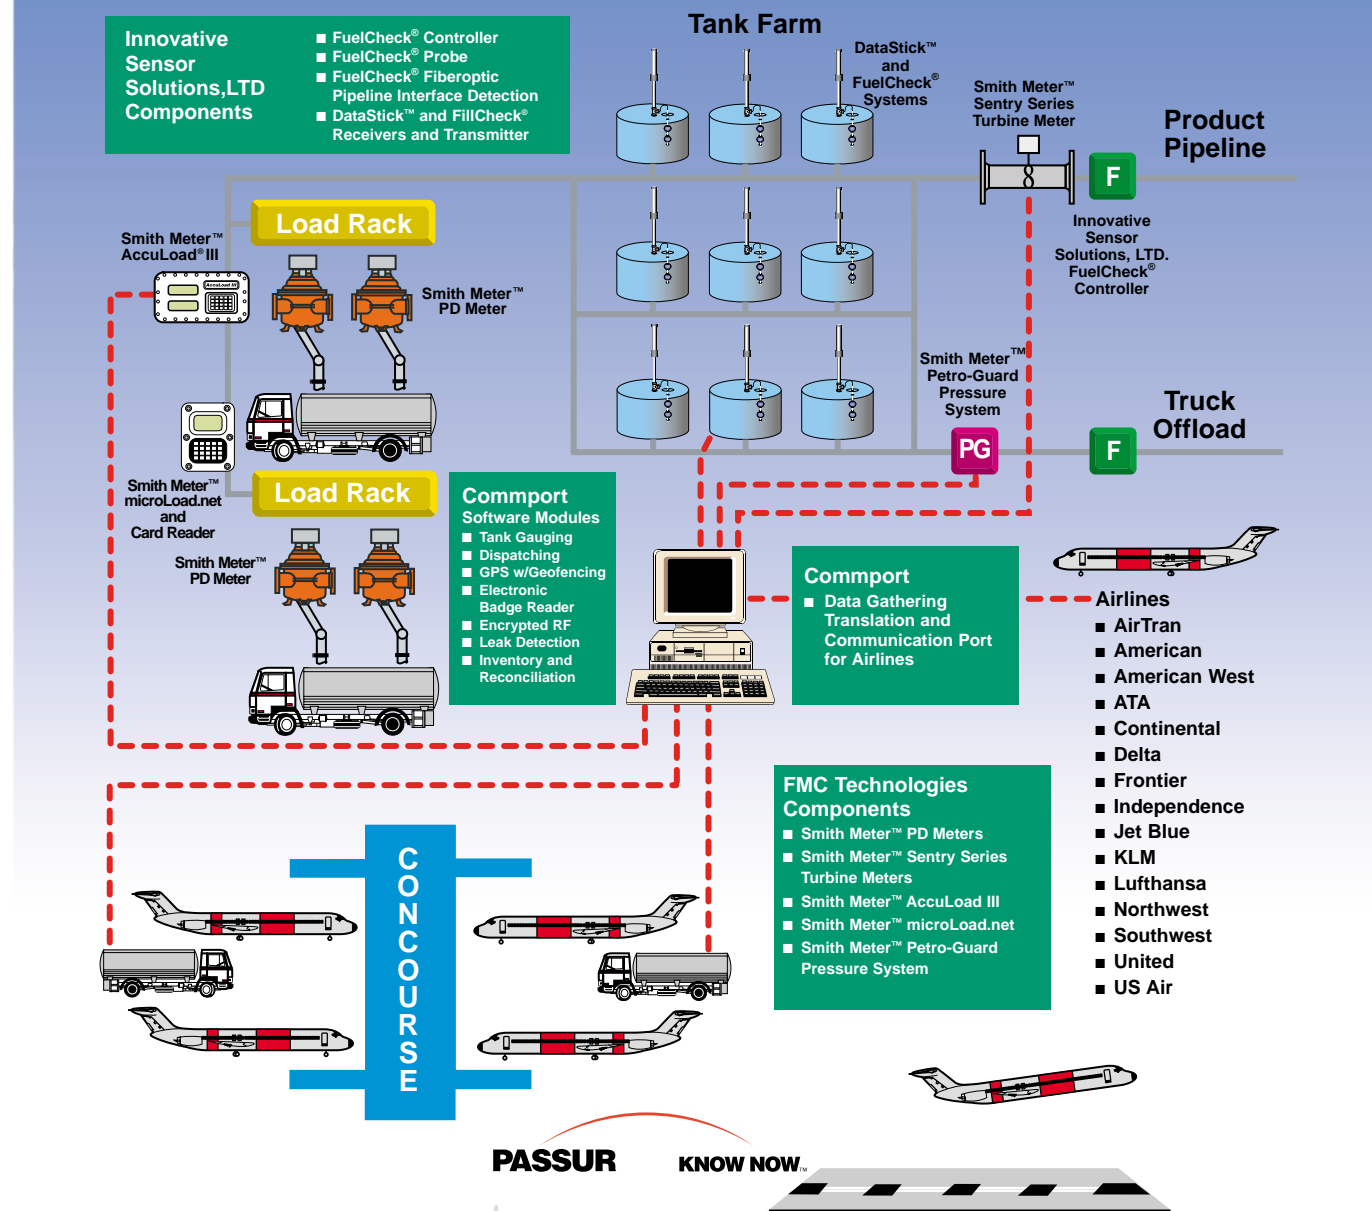

Over 100 years of experience

Our past experience as renowned suppliers of aviation equipment and systems gives us the strength and capability to develop state of the art systems that combine technological solutions with the highest safety standards.

Value-added system solutions tailored to the customers' issues are necessary to provide high efficiency. Worldwide Sening™, Smith Meter™ and LTS Sales brands are structured for optimal responsiveness to the specific requirements of the international aviation companies, truck builders and operators.

Our systems solutions are based on a thorough understanding of diverse conditions and the customers application. Our full range of products offer components that perfectly fit to build reliable and safe systems. User-Friendly operation and software keeps down-times low, increases efficiency and provides easy dispatching.

The Sening™, Smith Meter™ and LTS solutions provide more safety for the owner, operators and the environment.

Smith Meter™ ASF-4-NF Aviation Meter

Smith Meter™ PRIME 4 Meter

Smith Meter™ microLoad.net

Sening™ MultiFlow

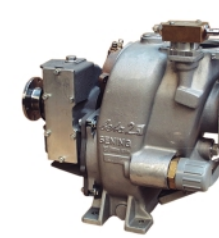

Sening™ Aviation Additive Injector

Sening™ Truck Fittings

Sening™ API Coupler

Sening™ Centrifugal Pump

Sening™ MultiControl Deadman/Remote

Economic Aviation Systems

FMC Technologies Measurement Solutions and LTS Sales understand the issues and problems of today's supply chain management in the aviation industry. To solve these issues, we offer products and systems tailored to meet the needs and specific requirements of each individual customer.

Technical solutions significantly influence the efficiency and economical success of a business operating in the aviation supply chain management.

As a partner to the customer we cooperate with you to find the best and most cost-effective solutions for your application requirements.

From Inbound...

...to Outbound

The Smith Meter™ Petro-Guard system is ideal for Truck Off-loading Jet Fuel at the airport to insure the accurate receipt of Jet fuel from 100 gpm to 2,000 gpm. The Smith Meter™ Petro-Guard system in conjunction with special air eliminator and control valve incorporates advanced electronics or the more traditional mechanical system to protect against the metering of air.

Intelligent Solutions

From the traditional mechanical equipment to the state-of-art electronic system, FMC Technologies Measurement Solutions and LTS Sales have the technology and systems to make truck refueling **FASTER, SAFER, and MORE ECONOMICAL.** We can provide one-stop solutions for your supply chain management needs, **TODAY** and in the **FUTURE.**
